

CONTENTS

Chapter 1—REVIEW OF VECTOR ANALYSIS	1
1.1 COORDINATE SYSTEMS	2
1.1.1 Rectangular (Cartesian) Coordinates	2
1.1.2 Circular Cylindrical Coordinates	4
1.1.3 Spherical Coordinates	4
1.2 VECTOR ALGEBRA	7
1.2.1 Scalars and Vectors	7
1.2.2 Multiplication of a Vector by a Scalar	8
1.2.3 Addition and Subtraction	9
1.2.4 The Dot (Scalar) Product	11
1.2.5 The Cross (Vector) Product	13
1.3 THE GRADIENT AND THE DEL OPERATOR	16
1.3.1 The Gradient	16
1.3.2 Curvilinear Coordinates	17
(a) Cylindrical	17
(b) Spherical	17
1.3.3 The Line Integral	18
1.4 FLUX AND DIVERGENCE	21
1.4.1 Flux	22
1.4.2 Divergence	23
1.4.3 Curvilinear Coordinates	24
(a) Cylindrical Coordinates	24
(b) Spherical Coordinates	26
1.4.4 The Divergence Theorem	26
1.5 THE CURL AND STOKES' THEOREM	28
1.5.1 Curl	28
1.5.2 The Curl for Curvilinear Coordinates	31
(a) Cylindrical Coordinates	31
(b) Spherical Coordinates	33
1.5.3 Stokes' Theorem	35
1.5.4 Some Useful Vector Relations	38
(a) The Curl of the Gradient is Zero	
$[\nabla \times (\nabla f) = 0]$	38
(b) The Divergence of the Curl is Zero	
$[\nabla \cdot (\nabla \times \mathbf{A}) = 0]$	39
PROBLEMS	39
Chapter 2—THE ELECTRIC FIELD	49
2.1 ELECTRIC CHARGE	50
2.1.1 Charging by Contact	50
2.1.2 Electrostatic Induction	52
2.1.3 Faraday's "Ice-Pail" Experiment	53
2.2 THE COULOMB FORCE LAW BETWEEN STATIONARY CHARGES	54
2.2.1 Coulomb's Law	54

2.2.2	Units	55
2.2.3	The Electric Field	56
2.2.4	Superposition	57
2.3	CHARGE DISTRIBUTIONS	59
2.3.1	Line, Surface, and Volume Charge Distributions	60
2.3.2	The Electric Field Due to a Charge Distribution	63
2.3.3	Field Due to an Infinitely Long Line Charge	64
2.3.4	Field Due to Infinite Sheets of Surface Charge	65
	(a) Single Sheet	65
	(b) Parallel Sheets of Opposite Sign	67
	(c) Uniformly Charged Volume	68
2.3.5	Hoops of Line Charge	69
	(a) Single Hoop	69
	(b) Disk of Surface Charge	69
	(c) Hollow Cylinder of Surface Charge	71
	(d) Cylinder of Volume Charge	72
2.4	GAUSS'S LAW	72
2.4.1	Properties of the Vector Distance Between two Points \mathbf{r}_{QP}	72
	(a) \mathbf{r}_{QP}	72
	(b) Gradient of the Reciprocal Distance, $\nabla(1/r_{QP})$	73
	(c) Laplacian of the Reciprocal Distance	73
2.4.2	Gauss's Law In Integral Form	74
	(a) Point Charge Inside or Outside a Closed Volume	74
	(b) Charge Distributions	75
2.4.3	Spherical Symmetry	76
	(a) Surface Charge	76
	(b) Volume Charge Distribution	79
2.4.4	Cylindrical Symmetry	80
	(a) Hollow Cylinder of Surface Charge	80
	(b) Cylinder of Volume Charge	82
2.4.5	Gauss's Law and the Divergence Theorem	82
2.4.6	Electric Field Discontinuity Across a Sheet of Surface Charge	83
2.5	THE ELECTRIC POTENTIAL	84
2.5.1	Work Required to Move a Point Charge	84
2.5.2	The Electric Field and Stokes' Theorem	85
2.5.3	The Potential and the Electric Field	86
2.5.4	Finite Length Line Charge	88
2.5.5	Charged Spheres	90
	(a) Surface Charge	90
	(b) Volume Charge	91
	(c) Two Spheres	92

2.5.6	<i>Poisson's and Laplace's Equations</i>	93
2.6	THE METHOD OF IMAGES WITH LINE CHARGES AND CYLINDERS	93
2.6.1	<i>Two Parallel Line Charges</i>	93
2.6.2	<i>The Method of Images</i>	96
	(a) <i>General Properties</i>	96
	(b) <i>Line Charge Near a Conducting Plane</i>	96
2.6.3	<i>Line Charge and Cylinder</i>	97
2.6.4	<i>Two Wire Line</i>	99
	(a) <i>Image Charges</i>	99
	(b) <i>Force of Attraction</i>	100
	(c) <i>Capacitance Per Unit Length</i>	101
2.7	THE METHOD OF IMAGES WITH POINT CHARGES AND SPHERES	103
2.7.1	<i>Point Charge and a Grounded Sphere</i>	103
2.7.2	<i>Point Charge Near a Grounded Plane</i>	106
2.7.3	<i>Sphere With Constant Charge</i>	109
2.7.4	<i>Constant Voltage Sphere</i>	110
	PROBLEMS	110
	 Chapter 3—POLARIZATION AND CONDUCTION	 135
3.1	POLARIZATION	136
3.1.1	<i>The Electric Dipole</i>	137
3.1.2	<i>Polarization Charge</i>	140
3.1.3	<i>The Displacement Field</i>	143
3.1.4	<i>Linear Dielectrics</i>	143
	(a) <i>Polarizability</i>	143
	(b) <i>The Local Electric Field</i>	145
3.1.5	<i>Spontaneous Polarization</i>	149
	(a) <i>Ferro-electrics</i>	149
	(b) <i>Electrets</i>	151
3.2	CONDUCTION	152
3.2.1	<i>Conservation of Charge</i>	152
3.2.2	<i>Charged Gas Conduction Models</i>	154
	(a) <i>Governing Equations</i>	154
	(b) <i>Drift-Diffusion Conduction</i>	156
	(c) <i>Ohm's Law</i>	159
	(d) <i>Superconductors</i>	160
3.3	FIELD BOUNDARY CONDITIONS	161
3.3.1	<i>Tangential Component of \mathbf{E}</i>	162
3.3.2	<i>Normal Component of \mathbf{D}</i>	163
3.3.3	<i>Point Charge Above a Dielectric Boundary</i>	164
3.3.4	<i>Normal Component of \mathbf{P} and $\epsilon_0\mathbf{E}$</i>	165
3.3.5	<i>Normal Component of \mathbf{J}</i>	168
3.4	RESISTANCE	169
3.4.1	<i>Resistance Between Two Electrodes</i>	169
3.4.2	<i>Parallel Plate Resistor</i>	170

3.4.3	<i>Coaxial Resistor</i>	172
3.4.4	<i>Spherical Resistor</i>	173
3.5	CAPACITANCE	173
3.5.1	<i>Parallel Plate Electrodes</i>	173
3.5.2	<i>Capacitance for any Geometry</i>	177
3.5.3	<i>Current Flow Through a Capacitor</i>	178
3.5.4	<i>Capacitance of Two Contacting Spheres</i>	178
3.6	LOSSY MEDIA	181
3.6.1	<i>Transient Charge Relaxation</i>	182
3.6.2	<i>Uniformly Charged Sphere</i>	183
3.6.3	<i>Series Lossy Capacitor</i>	184
	(a) <i>Charging Transient</i>	184
	(b) <i>Open Circuit</i>	187
	(c) <i>Short Circuit</i>	188
	(d) <i>Sinusoidal Steady State</i>	188
3.6.4	<i>Distributed Systems</i>	189
	(a) <i>Governing Equations</i>	189
	(b) <i>Steady State</i>	191
	(c) <i>Transient Solution</i>	192
3.6.5	<i>Effects of Convection</i>	194
3.6.6	<i>The Earth and Its Atmosphere as a Leaky Spherical Capacitor</i>	195
3.7	FIELD-DEPENDENT SPACE CHARGE DISTRIBUTIONS	197
3.7.1	<i>Space Charge Limited Vacuum Tube Diode</i>	198
3.7.2	<i>Space Charge Limited Conduction in Dielectrics</i>	201
3.8	ENERGY STORED IN A DIELECTRIC MEDIUM	204
3.8.1	<i>Work Necessary to Assemble a Distribution of Point Charges</i>	204
	(a) <i>Assembling the Charges</i>	204
	(b) <i>Binding Energy of a Crystal</i>	205
3.8.2	<i>Work Necessary to Form a Continuous Charge Distribution</i>	206
3.8.3	<i>Energy Density of the Electric Field</i>	208
3.8.4	<i>Energy Stored in Charged Spheres</i>	210
	(a) <i>Volume Charge</i>	210
	(b) <i>Surface Charge</i>	210
	(c) <i>Binding Energy of an Atom</i>	211
3.8.5	<i>Energy Stored In a Capacitor</i>	212
3.9	FIELDS AND THEIR FORCES	213
3.9.1	<i>Force Per Unit Area On a Sheet of Surface Charge</i>	213
3.9.2	<i>Forces On a Polarized Medium</i>	215
	(a) <i>Force Density</i>	215
	(b) <i>Permanently Polarized Medium</i>	216
	(c) <i>Linearly Polarized Medium</i>	218

3.9.3	<i>Forces On a Capacitor</i>	219
3.10	ELECTROSTATIC GENERATORS	223
3.10.1	<i>Van de Graaff Generator</i>	223
3.10.2	<i>Self-Excited Electrostatic Induction Machines</i>	224
3.10.3	<i>Self-Excited Three-Phase Alternating Voltages</i>	227
3.10.4	<i>Self-Excited Multi-Frequency Generators</i>	229
	PROBLEMS	231
Chapter 4	ELECTRIC FIELD BOUNDARY VALUE PROBLEMS	257
4.1	THE UNIQUENESS THEOREM	258
4.2	BOUNDARY VALUE PROBLEMS IN CARTESIAN GEOMETRIES	259
4.2.1	<i>Separation of Variables</i>	260
4.2.2	<i>Zero Separation Constant Solutions</i>	261
(a)	<i>Hyperbolic Electrodes</i>	261
(b)	<i>Resistor In an Open Box</i>	262
4.2.3	<i>Nonzero Separation Constant Solutions</i>	264
4.2.4	<i>Spatially Periodic Excitation</i>	265
4.2.5	<i>Rectangular Harmonics</i>	267
4.2.6	<i>Three-Dimensional Solutions</i>	270
4.3	SEPARATION OF VARIABLES IN CYLINDRICAL GEOMETRY	271
4.3.1	<i>Polar Solutions</i>	271
4.3.2	<i>Cylinder in a Uniform Electric Field</i>	273
(a)	<i>Field Solutions</i>	273
(b)	<i>Field Line Plotting</i>	276
4.3.3	<i>Three-Dimensional Solutions</i>	277
4.3.4	<i>High Voltage Insulator Bushing</i>	282
4.4	PRODUCT SOLUTIONS IN SPHERICAL GEOMETRY	284
4.4.1	<i>One-Dimensional Solutions</i>	284
4.4.2	<i>Axisymmetric Solutions</i>	286
4.4.3	<i>Conducting Spheres in a Uniform Field</i>	288
(a)	<i>Field Solutions</i>	288
(b)	<i>Field Line Plotting</i>	290
4.4.4	<i>Charged Particle Precipitation Onto a Sphere</i>	293
4.5	A NUMERICAL METHOD— SUCCESSIVE RELAXATION	297
4.5.1	<i>Finite Difference Expansions</i>	297
4.5.2	<i>Potential Inside a Square Box</i>	298
	PROBLEMS	301
Chapter 5	THE MAGNETIC FIELD	313
5.1	FORCES ON MOVING CHARGES	314

5.1.1	<i>The Lorentz Force Law</i>	314
5.1.2	<i>Charge Motions in a Uniform Magnetic Field</i>	316
5.1.3	<i>The Mass Spectrograph</i>	318
5.1.4	<i>The Cyclotron</i>	319
5.1.5	<i>Hall Effect</i>	321
5.2	MAGNETIC FIELD DUE TO CURRENTS	322
5.2.1	<i>The Biot-Savart Law</i>	322
5.2.2	<i>Line Currents</i>	324
5.2.3	<i>Current Sheets</i>	325
	(a) <i>Single Sheet of Surface Current</i>	325
	(b) <i>Slab of Volume Current</i>	327
	(c) <i>Two Parallel Current Sheets</i>	328
5.2.4	<i>Hoops of Line Current</i>	329
	(a) <i>Single Hoop</i>	329
	(b) <i>Two Hoops (Helmholtz Coil)</i>	331
	(c) <i>Hollow Cylinder of Surface Current</i>	331
5.3	DIVERGENCE AND CURL OF THE MAGNETIC FIELD	332
5.3.1	<i>Gauss's Law for the Magnetic Field</i>	332
5.3.2	<i>Ampere's Circuital Law</i>	333
5.3.3	<i>Currents With Cylindrical Symmetry</i>	335
	(a) <i>Surface Current</i>	335
	(b) <i>Volume Current</i>	336
5.4	THE VECTOR POTENTIAL	336
5.4.1	<i>Uniqueness</i>	336
5.4.2	<i>The Vector Potential of a Current Distribution</i>	338
5.4.3	<i>The Vector Potential and Magnetic Flux</i>	338
	(a) <i>Finite Length Line Current</i>	339
	(b) <i>Finite Width Surface Current</i>	341
	(c) <i>Flux Through a Square Loop</i>	342
5.5	MAGNETIZATION	343
5.5.1	<i>The Magnetic Dipole</i>	344
5.5.2	<i>Magnetization Currents</i>	346
5.5.3	<i>Magnetic Materials</i>	349
	(a) <i>Diamagnetism</i>	349
	(b) <i>Paramagnetism</i>	352
	(c) <i>Ferromagnetism</i>	356
5.6	BOUNDARY CONDITIONS	359
5.6.1	<i>Tangential Component of \mathbf{H}</i>	359
5.6.2	<i>Tangential Component of \mathbf{M}</i>	360
5.6.3	<i>Normal Component of \mathbf{B}</i>	360
5.7	MAGNETIC FIELD BOUNDARY VALUE PROBLEMS	361
5.7.1	<i>The Method of Images</i>	361
5.7.2	<i>Sphere in a Uniform Magnetic Field</i>	364
5.8	MAGNETIC FIELDS AND FORCES	368

5.8.1	<i>Magnetizable Media</i>	368
5.8.2	<i>Force on a Current Loop</i>	370
	(a) <i>Lorentz Force Only</i>	370
	(b) <i>Magnetization Force Only</i>	370
	(c) <i>Lorentz and Magnetization Forces</i>	374
	PROBLEMS	375
 Chapter 6—ELECTROMAGNETIC INDUCTION		393
6.1	FARADAY'S LAW OF INDUCTION	394
6.1.1	<i>The Electromotive Force (EMF)</i>	394
6.1.2	<i>Lenz's Law</i>	395
	(a) <i>Short Circuited Loop</i>	397
	(b) <i>Open Circuited Loop</i>	399
	(c) <i>Reaction Force</i>	400
6.1.3	<i>Laminations</i>	401
6.1.4	<i>Betatron</i>	402
6.1.5	<i>Faraday's Law and Stokes' Theorem</i>	404
6.2	MAGNETIC CIRCUITS	405
6.2.1	<i>Self-Inductance</i>	405
6.2.2	<i>Reluctance</i>	409
	(a) <i>Reluctances in Series</i>	410
	(b) <i>Reluctances in Parallel</i>	411
6.2.3	<i>Transformer Action</i>	411
	(a) <i>Voltages are Not Unique</i>	411
	(b) <i>Ideal Transformers</i>	413
	(c) <i>Real Transformers</i>	416
6.3	FARADAY'S LAW FOR MOVING MEDIA	417
6.3.1	<i>The Electric Field Transformation</i>	417
6.3.2	<i>Ohm's Law for Moving Conductors</i>	417
6.3.3	<i>Faraday's Disk (Homopolar Generator)</i>	420
	(a) <i>Imposed Magnetic Field</i>	420
	(b) <i>Self-Excited Generator</i>	422
	(c) <i>Self-Excited ac Operation</i>	424
	(d) <i>Periodic Motor Speed Reversals</i>	426
6.3.4	<i>Basic Motors and Generators</i>	427
	(a) <i>ac Machines</i>	427
	(b) <i>dc Machines</i>	428
6.3.5	<i>MHD Machines</i>	430
6.3.6	<i>Paradoxes</i>	430
	(a) <i>A Commutatorless dc Machine</i>	431
	(b) <i>Changes In Magnetic Flux Due to Switching</i>	433
	(c) <i>Time Varying Number of Turns on a Coil</i>	433
6.4	MAGNETIC DIFFUSION INTO AN OHMIC CONDUCTOR	435
6.4.1	<i>Resistor-Inductor Model</i>	435

6.4.2	<i>The Magnetic Diffusion Equation</i>	437
6.4.3	<i>Transient Solution With No Motion</i> ($U = 0$)	438
6.4.4	<i>The Sinusoidal Steady State (Skin Depth)</i>	442
6.4.5	<i>Effects of Convection</i>	444
6.4.6	<i>A Linear Induction Machine</i>	446
6.4.7	<i>Superconductors</i>	450
6.5	ENERGY STORED IN THE MAGNETIC FIELD	451
6.5.1	<i>A Single Current Loop</i>	451
	(a) <i>Electrical Work</i>	452
	(b) <i>Mechanical Work</i>	453
6.5.2	<i>Energy and Inductance</i>	454
6.5.3	<i>Current Distributions</i>	454
6.5.4	<i>Magnetic Energy Density</i>	455
6.5.5	<i>The Coaxial Cable</i>	456
	(a) <i>External Inductance</i>	456
	(b) <i>Internal Inductance</i>	457
6.5.6	<i>Self-Inductance, Capacitance, and Resistance</i>	458
6.6	THE ENERGY METHOD FOR FORCES	460
6.6.1	<i>The Principle of Virtual Work</i>	460
6.6.2	<i>Circuit Viewpoint</i>	461
6.6.3	<i>Magnetization Force</i>	464
	PROBLEMS	465
Chapter 7—ELECTRODYNAMICS—FIELDS AND WAVES		487
7.1	MAXWELL'S EQUATIONS	488
7.1.1	<i>Displacement Current Correction to Ampere's Law</i>	488
7.1.2	<i>Circuit Theory as a Quasi-static Approximation</i>	490
7.2	CONSERVATION OF ENERGY	490
7.2.1	<i>Poynting's Theorem</i>	490
7.2.2	<i>A Lossy Capacitor</i>	491
7.2.3	<i>Power in Electric Circuits</i>	493
7.2.4	<i>The Complex Poynting's Theorem</i>	494
7.3	TRANSVERSE ELECTROMAGNETIC WAVES	496
7.3.1	<i>Plane Waves</i>	496
7.3.2	<i>The Wave Equation</i>	497
	(a) <i>Solutions</i>	497
	(b) <i>Properties</i>	499
7.3.3	<i>Sources of Plane Waves</i>	500
7.3.4	<i>A Brief Introduction to the Theory of Relativity</i>	503
7.4	SINUSOIDAL TIME VARIATIONS	505
7.4.1	<i>Frequency and Wavenumber</i>	505

7.4.2	<i>Doppler Frequency Shifts</i>	507
7.4.3	<i>Ohmic Losses</i>	508
	(a) <i>Low Loss Limit</i>	509
	(b) <i>Large Loss Limit</i>	511
7.4.4	<i>High-Frequency Wave Propagation in Media</i>	511
7.4.5	<i>Dispersive Media</i>	512
7.4.6	<i>Polarization</i>	514
	(a) <i>Linear Polarization</i>	515
	(b) <i>Circular Polarization</i>	515
7.4.7	<i>Wave Propagation in Anisotropic Media</i>	516
	(a) <i>Polarizers</i>	517
	(b) <i>Double Refraction (Birefringence)</i>	518
7.5	NORMAL INCIDENCE ONTO A PERFECT CONDUCTOR	520
7.6	NORMAL INCIDENCE ONTO A DIELECTRIC	522
7.6.1	<i>Lossless Dielectric</i>	522
7.6.2	<i>Time-Average Power Flow</i>	524
7.6.3	<i>Lossy Dielectric</i>	524
	(a) <i>Low Losses</i>	525
	(b) <i>Large Losses</i>	525
7.7	UNIFORM AND NONUNIFORM PLANE WAVES	529
7.7.1	<i>Propagation at an Arbitrary Angle</i>	529
7.7.2	<i>The Complex Propagation Constant</i>	530
7.7.3	<i>Nonuniform Plane Waves</i>	532
7.8	OBLIQUE INCIDENCE ONTO A PERFECT CONDUCTOR	534
7.8.1	<i>E Field Parallel to the Interface</i>	534
7.8.2	<i>H Field Parallel to the Interface</i>	536
7.9	OBLIQUE INCIDENCE ONTO A DIELECTRIC	538
7.9.1	<i>E Parallel to the Interface</i>	538
7.9.2	<i>Brewster's Angle of No Reflection</i>	540
7.9.3	<i>Critical Angle of Transmission</i>	541
7.9.4	<i>H Field Parallel to the Boundary</i>	542
7.10	APPLICATIONS TO OPTICS	544
7.10.1	<i>Reflections from a Mirror</i>	545
7.10.2	<i>Lateral Displacement of a Light Ray</i>	545
7.10.3	<i>Polarization by Reflection</i>	546
7.10.4	<i>Light Propagation in Water</i>	548
	(a) <i>Submerged Source</i>	548
	(b) <i>Fish Below a Boat</i>	548
7.10.5	<i>Totally Reflecting Prisms</i>	549
7.10.6	<i>Fiber Optics</i>	550
	(a) <i>Straight Light Pipe</i>	550
	(b) <i>Bent Fibers</i>	551
	PROBLEMS	552

Chapter 8—GUIDED ELECTROMAGNETIC WAVES	567
8.1 THE TRANSMISSION LINE EQUATIONS	568
8.1.1 <i>The Parallel Plate Transmission Line</i>	568
8.1.2 <i>General Transmission Line Structures</i>	570
8.1.3 <i>Distributed Circuit Representation</i>	575
8.1.4 <i>Power Flow</i>	576
8.1.5 <i>The Wave Equation</i>	578
8.2 TRANSMISSION LINE TRANSIENT WAVES	579
8.2.1 <i>Transients on Infinitely Long Transmission Lines</i>	579
8.2.2 <i>Reflections from Resistive Terminations</i>	581
(a) <i>Reflection Coefficient</i>	581
(b) <i>Step Voltage</i>	582
8.2.3 <i>Approach to the dc Steady State</i>	585
8.2.4 <i>Inductors and Capacitors as Quasi-static Approximations to Transmission Lines</i>	589
8.2.5 <i>Reflections from Arbitrary Terminations</i>	592
8.3 SINUSOIDAL TIME VARIATIONS	595
8.3.1 <i>Solutions to the Transmission Line Equations</i>	595
8.3.2 <i>Lossless Terminations</i>	596
(a) <i>Short Circuited Line</i>	596
(b) <i>Open Circuited Line</i>	599
8.3.3 <i>Reactive Circuit Elements as Approximations to Short Transmission Lines</i>	601
8.3.4 <i>Effects of Line Losses</i>	602
(a) <i>Distributed Circuit Approach</i>	602
(b) <i>Distortionless Lines</i>	603
(c) <i>Fields Approach</i>	604
8.4 ARBITRARY IMPEDANCE TERMINATIONS	607
8.4.1 <i>The Generalized Reflection Coefficient</i>	607
8.4.2 <i>Simple Examples</i>	608
(a) <i>Load Impedance Reflected Back to the Source</i>	608
(b) <i>Quarter Wavelength Matching</i>	610
8.4.3 <i>The Smith Chart</i>	611
8.4.4 <i>Standing Wave Parameters</i>	616
8.5 STUB TUNING	620
8.5.1 <i>Use of the Smith Chart for Admittance Calculations</i>	620
8.5.2 <i>Single-Stub Matching</i>	623
8.5.3 <i>Double-Stub Matching</i>	625
8.6 THE RECTANGULAR WAVEGUIDE	629
8.6.1 <i>Governing Equations</i>	630
8.6.2 <i>Transverse Magnetic (TM) Modes</i>	631

8.6.3	<i>Transverse Electric (TE) Modes</i>	635
8.6.4	<i>Cut-Off</i>	638
8.6.5	<i>Waveguide Power Flow</i>	641
	(a) <i>Power Flow for the TM Modes</i>	641
	(b) <i>Power Flow for the TE Modes</i>	642
8.6.6	<i>Wall Losses</i>	643
8.7	DIELECTRIC WAVEGUIDE	644
8.7.1	<i>TM Solutions</i>	644
	(a) <i>Odd Solutions</i>	645
	(b) <i>Even Solutions</i>	647
8.7.2	<i>TE Solutions</i>	647
	(a) <i>Odd Solutions</i>	647
	(b) <i>Even Solutions</i>	648
	PROBLEMS	649
Chapter 9	—RADIATION	663
9.1	THE RETARDED POTENTIALS	664
9.1.1	<i>Nonhomogeneous Wave Equations</i>	664
9.1.2	<i>Solutions to the Wave Equation</i>	666
9.2	RADIATION FROM POINT DIPOLES	667
9.2.1	<i>The Electric Dipole</i>	667
9.2.2	<i>Alternate Derivation Using the Scalar Potential</i>	669
9.2.3	<i>The Electric and Magnetic Fields</i>	670
9.2.4	<i>Electric Field Lines</i>	671
9.2.5	<i>Radiation Resistance</i>	674
9.2.6	<i>Rayleigh Scattering (or why is the sky blue?)</i>	677
9.2.7	<i>Radiation from a Point Magnetic Dipole</i>	679
9.3	POINT DIPOLE ARRAYS	681
9.3.1	<i>A Simple Two Element Array</i>	681
	(a) <i>Broadside Array</i>	683
	(b) <i>End-fire Array</i>	685
	(c) <i>Arbitrary Current Phase</i>	685
9.3.2	<i>An N Dipole Array</i>	685
9.4	LONG DIPOLE ANTENNAS	687
9.4.1	<i>Far Field Solution</i>	688
9.4.2	<i>Uniform Current</i>	690
9.4.3	<i>Radiation Resistance</i>	691
	PROBLEMS	695
	SOLUTIONS TO SELECTED PROBLEMS	699
	INDEX	711
